INDEX TO VOLUME XLVI

[NOTE.—In this index the title of principal papers and headings of departments, as *Discussions,* are in italics.]

Abstracts—
Abnormal copper, lead, and zinc content of soil near metalliferous veins (Huff), 108
Age of the granites of the Northern Rhodesian copperbelt (Garlick and Brummer), 478
Allard Lake ilmenite deposits (Hammond), 799
Alpine lead-zinc ores of Europe (Jicha), 707
Applications of geophysical methods of underground exploration in civil engineering (Sowers), 113
Case histories of resistivity applied to near surface geology (Schwendinger and Gabriel), 116
Chemical analyses of constituents of clarain (Kosanke), 807
Classification and definitions of textures and mineral structures in ores (Schwartz), 578
Classification of textures of ores (Schwartz), 114
Composition of argillaceous rocks in relation to their conditions of genesis (Millot), 103
Contribution of geophysical surveys to the discovery of Stilfontein gold mine in South Africa (Weiss), 113
Copper mineralization in the Fungurume region, Katanga (Oosterbosch and Schuiling), 121
Design of underground mines (Loofbourow), 104
Determination of the temperature and pressure of formation of minerals by the decrepitometric method (Smith), 112
Differential thermal curves of some Arkansas lignites (Smothers and Chiang), 807
Dry weather stream flow as an indicator of geology and ground water (Bernhagen), 106
Effect of post-ore dike intrusion on Butte ore minerals (Sales and Meyer), 103; 813
Electrical well-logging equipment of the Iowa Geological Survey and its operation (Hershey and Hale), 106
Engineering geology principles of subterranean installations (Kiersch), 208

Abstracts—Continued
Fairview mine, Similkameen district, B. C. (Swanson), 109
Formation of late magmatic oxide ores (Bateman), 115; 404
Geochemical techniques as applied in recent investigations in the Tintic district, Utah, 608
Geologic factors leading to negative results in exploration for zinc at White Pine, Tenn. (Brokaw), 116
Geologic studies in a New Mexico potash mine (Dunlap), 909
Geological investigations and geochemical prospecting experiment at Johnson, Arizona (Cooper and Huff), 731
Geology of ground water in St. Louis City and County (Grohskopf), 105
Geology of kyanite deposits at Henry Knob, South Carolina (Smith and Newcome), 757
Geology of the Hayden Creek lead mine, southeastern Mo. (Ohle), 111
Ground water behavior in the Hershey Valley, Pennsylvania (Foose), 801
Ground water in alluvial deposits in Oklahoma (Schoff and Reed), 76
Grpund water in Tel Aviv, Israel (Rose), 107
Guides to ore in the Pachuca silver district, Mexico (Wisser), 109
Ilmenite, magnetite, hematite, and copper in lavas of the Keweenawan series (Cornwall), 51
Importance of Pleistocene studies for ground-water investigations in Kansas (Frye), 106
Influence of permeability on ore distribution in limestone and dolomite (Ohle), 667
Influence of the immersion medium on the rotation properties of anisotropic minerals in reflected light (Cameron), 68
Integrated geophysical and geological investigation of aquifers in glacial drift near Champaign-Urbana, Illinois (Foster and Buhle), 103, 367
Interrelation of mining geology and mineral dressing (Farwell and Davis), 111
Interrelation of structure and Pennsylvanian sedimentation in central Illinois (Du Bois), 810

INDEX TO VOLUME XLVI

[NOTE.—In this index the title of principal papers and headings of departments, as *Discussions,* are in italics.]

Abstracts—
Abnormal copper, lead, and zinc content of soil near metalliferous veins (Huff), 108
Age of the granites of the Northern Rhodesian copperbelt (Garlick and Brummer), 478

Influence of the immersion medium on the rotation properties of anisotropic minerals in reflected light (Cameron), 68
Integrated geophysical and geological investigation of aquifers in glacial drift near Champaign-Urbana, Illinois (Foster and Buhle), 103, 367
Interrelation of mining geology and mineral dressing (Farwell and Davis), 111
Interrelation of structure and Pennsylvanian sedimentation in central Illinois (Du Bois), 810

Abstracts—Continued
Investigations on the origin and detection of cold-precipitated hydrated ferric oxide in clays (Mackenzie), 110
Iron ore at Bomi Hill, Liberia (Fitzhugh), 800
Iron ore deposits of new Quebec and Labrador (Betty and Moss), 799
Kentron microhardness tester, a quantitative tool in opaque mineral identification (Robertson and Van Meter), 541
Low temperature mineralization in the Canadian Shield, and its relation to gold deposition (Little), 112
Metallogenic epochs in Idaho (Anderson), 592
Metamorphism of coal (Lahiri), 252
Mineralogy, petrography and petrology of the K-bentonites (Weaver and Bates), 803
Natural pozzolans for concrete (Mielenz, Greene, and Schieltz), 311
Notes on manganese ores of Brazil (Park, Dorr, Guild, and Barbosa), 1
Observations on relations of hydrous aluminum oxide minerals to clay (Allen), 110
Occurrence and relationships of some mica and apatite deposits in southeastern Ontario (Currie), 765
Occurrence of gold at the Getchell Mine, Nevada (Joralemon), 267
Occurrence of native gold in an ice lens—Giant-Yellowknife gold mines, Yellowknife, Northwest Territories (Boyle), 223
Opaque matter in coal (Hacquebard), 805
Ore-shoots of the Bolivian tin deposits (Turneaure), 108
Origin and salinity distribution of artesian water in the Adelaide Plains, South Australia (Miles), 193
Origin of emery deposits (Friedman), 113
Origin of thick-bedded salt deposits (Landes), 798
Outcrops in limestone as ore guides (Behre), 115
Paragenesis of the Tri-State jasperoid (Bastin), 652
Pegmatites of the Van Horn Mountains, Texas (Flawn), 163
Petrographic analysis of column samples by combined thin-section and broken-coal method with results on a sample of No. 6 coal from St. Clair County, Illinois (Parks and O'Donnell), 805
Petrography of American lignites (Parks), 23
Physical chemistry of quicksilver transportation in vein fluids (Krauskopf), 498
Abstracts—Continued
Practical significance of the petrographic characteristics of two Kansas coal beds (Hambleton), 807
Relation of factors affecting ground and rock temperature at shallow depths (Lovering and Goode), 804
Report on the Third Conference on Carboniferous Stratigraphy and Geology at Heerlen, Netherlands, June 25–30, 809
Sedimentary facies changes in coal strata (Dapples), 809
Sensitive field test for detecting heavy metals in soil or sediment (Huff), 524
Shallow expressions of Silver Belt ore shoots, Coeur d'Alene district, Idaho (Sorenson), 109
Solubility of gold (Krauskopf), 858
Solubility of some minerals in superheated steam at high pressures (Morey and Hesselgesser), 821
Solution depressions in diorite in North Carolina (Legrand), 801
Some geologic characteristics of uranium-bearing vein deposits (Everhart and Wright), 802
Some recent correlations of Indiana coals (Wier), 810
Spectrographic study of platinum and palladium in common sulphides and arsenides of the Sudbury district, Ontario (Hawley, Lewis, and Wark), 149
Spore analyses applied to a coal correlation problem in southern Indiana (Guennel), 810
Stabilization of some rockslides in Grainger County, Tennessee (Laurence), 329
Status of summary coal resource surveys, Nov. 1, 1951, 808
Stratigraphic studies on graywackes at Ducktown, Tennessee (Snyder), 798
Structural control of some gold-base metal veins in eastern Grant County, Oregon (Allen), 398
Structural geology as the setting for mining operations (Wisser), 104
Structure and copper mineralization at the Elizabeth mine, Vermont (McKinstry), 798
Structure of the magnetite deposits in the Dover district, New Jersey (Sims), 800
Study of the Seyler theory of coal reflectance (McCartney), 806
Surface expression of veins in the Pachuca silver district, Mexico (Thornburg), 107
Tectonic analysis of a mining district: Pachuca, Mexico (Wisser), 459

Abstracts—Continued
Temperatures of mineral formation in bottom-run lead-zinc deposits of the upper Mississippi Valley, as indicated by liquid inclusions (Bailey and Cameron), 626
Underclay limestones (Wilson), 811
Uranium deposits—Beaverlodge area, Saskatchewan, Canada (Buffam), 802
Uranium deposits near Marysvale, Piute County, Utah (Gruner, Fetzer, and Rapaport), 243
Uranium mineralization in British Columbia (Stevenson), 353
Uranium mineralization in Todilto limestone near Grants, McKinley County, New Mexico (Gruner, Towle, and Gardiner), 802
Use of sensitive gamma ray detectors in prospecting (Russell and Scherbatskoy), 427
Vacuum differential thermal analysis of coal (Whitehead and King), 808
Variations in the thermoelectric properties of pyrite in association with gold ore (Mutch), 112
Water-soluble salts in limestones and dolomites (Lamar and Shrode), 805
X-ray diffraction studies of some physical components of coal (Siever), 806
Adams, F. D., on cavities, 706
Adams, J. E., on Permian, N. Mex., 911
Adelaide plains, South Australia, Origin and salinity distribution of artesian water in the (Miles), 193
Adirondacks, metamorphism, 772
titaniferous-magnetite deposits, 416
Adsorption, liquids and gases in capillaries, 698
Adularia, 652
Aeromagnetic surveys, Minnesota, iron, 84
Africa, water supply (review), 236
Age of the granites of the Northern Rhodesian copperbelt (Garlick and Brummer), 478
Aggregate and cement, petrology (review), 783
Agricola, G., review of book by, 234
Alabandite, 4, 13, 14, 818
Albite, 184
solubility in steam, 828
Alexander, A. E., and Johnson, P., on cubes, 253
Allanite, 355
Allen, E. T., and Crenshaw, J. L., on mercuric sulphide, 515
Allen, E. T., and Zies, E. G., on ore deposition, 727
Allen, E. T., Crenshaw, J. L., and Merwin, H. E., on marcarsite, 300
Allen, R. M., Jr., *Structural control of some gold-base metal veins in eastern Grant County, Oregon*, 398–403
on Grant Co., Ore., 399
Allen, V. T., abstract by, 110
Alluvial deposits in Oklahoma, Ground water in (Schoff and Reed), 76
Almeida, F. F. M., on manganese, 5
Almond, H., and Morris, H. T., *Geochemical techniques as applied in recent investigations in the Tintic district, Utah*, 608–625
Alpine lead-zinc ores of Europe (Jicha), 707
Alteration, Butte ore district, Mont., 813
dolomitization, 892
Idaho, Blue Wing district, 600
Iron Blossom zone, Tintic, Utah, 616, 622
iron formation, Mesabi, Minn., 84
Johnson area, Ariz., 740
limestone, East Tenn. zinc district, 873, 879, 881, 884, 886
manganese-silicate-carbonate-sulfide bodies, 12
Marysvale area, Utah, 248
Pachuca district, Mexico, 461; abstract, 107
pegmatite wall-rock, Texas, 180
Silver Belt, Idaho (abstract), 110
sites for underground plants, 221
Alunite, Marysvale, Utah, 250
Amalgam-gold determination of platinum, 155
America, North America, petroleum, possibilities (review), 553
structural geology (review), 553
American lignites, Petrography of (Parks), 23
Anatexis, 181
